SUMMARY

A third-year Computer Science Engineering student with interests in Artificial Intelligence, Automation, and Data Science. Pursuing a minor in Data Analytics with coursework in Business Intelligence and Data Warehousing. Has experience working on Python-based projects involving machine learning and data preprocessing, along with foundational knowledge of web programming.

Exposure to sensor technologies through academic automation projects has broadened understanding of real-world systems. Active participation in college events and clubs has helped develop teamwork, communication, and organizational skills. An enthusiastic learner with a strong interest in applying machine learning and data-driven approaches to practical problems.

TECHNICAL SKILLS

- **Programming:** C, Java, Python
 - **Web Technologies:** HTML, CSS, jQuery, Django
 - **Data Science & Machine Learning Tools:** Pandas, NumPy, Scikit-learn, OpenCV, HuggingFace
 - **Machine Learning Concepts:** Supervised and Unsupervised Learning Algorithms, Basic understanding of CNNs, OCR, NLP, Transformers
 - **Data Visualization & BI:** Power BI and Tableau
 - **Databases:** MySQL, Oracle Database, Firebase
 - **Tools & Platforms:** Jupyter Notebook, Google Colab, Kaggle, Docker, Linux, VMware
 - **Robotics & Simulation:** ROS2, Webots, Gazebo
-

AREAS OF INTEREST

- Machine Learning
 - Data Science
 - Artificial Intelligence
 - Automation Systems
-

EXPERIENCE

NTPC Industrial Data Monitoring Simulation (Internship: June 2025 - July 2025)

- Designed and simulated a 4-zone thermal power plant in Webots using TurtleBot3Burger for zone-wise data collection.
 - Developed a Python controller to log synthetic sensor data (temperature, power, irradiation) into CSV format during robot navigation.
 - Trained a machine learning model with a dataset to detect anomalies in different zones.
-

PROJECTS

Stock Market Intelligence Dashboard using Power BI

- Built an interactive Power BI dashboard analyzing S&P 500 stocks to visualize trends, sector performance, and top stocks
- Performed data cleaning and feature engineering using Power Query on historical stock datasets
- Designed a star schema data model and created DAX measures to generate dynamic KPIs and insights
- Implemented interactive visuals with slicers and filters for sector, ticker, and time-based analysis

Blockchain Money Laundering Detection via Wallet Behavior Graph Analysis

- Built a graph-based system to detect cryptocurrency money laundering using Ethereum wallet-to-wallet transaction data.
- Generated "Wallet DNA" behavioral fingerprints (fan-in/fan-out, transaction frequency, value patterns, temporal activity) to characterize wallet behavior.
- Detected abnormal Wallet DNA shifts and smurfing patterns such as fund splitting, multi-hop transfers, and recombination using Python (Pandas, NetworkX).

Smart Door Lock System using Face Recognition

- Developed an AI-based smart door lock system using facial recognition on Raspberry Pi, leveraging face embeddings to authenticate users against a known dataset.
 - Integrated LCD display for real-time status updates and successfully automated door access control based on facial verification.
-

EDUCATION

- B.Tech – Computer Science Engineering
 - Manipal Institute of Technology, Bengaluru
 - CGPA: 8.40 | 2023 – 2027
 - Senior Secondary (Class XII)
 - Board of Intermediate Education, Andhra Pradesh (BIEAP)
 - Percentage: 94.7% | 2021 – 2023
 - Secondary (Class X)
 - Central Board of Secondary Education (CBSE)
 - Percentage: 95.6% | 2021
-

CERTIFICATIONS

- AWS Cloud Practitioner Essentials issued by AWS
 - Generative AI with Large Language Models issued by Coursera and offered by AWS
 - Machine Learning with Python issued by Coursera and offered by IBM
 - AI Python issued by Coursera and offered by DeePLearning.AI
 - Programming in Java issued by NPTEL
 - Introduction to AI Professional certificate issued by Coursera and offered by IBM
 - Introduction to Software Engineering issued by Coursera and offered by IBM
 - Ordered Data Structures Professional certificate issued by Coursera and offered by Illinois
-

EXTRACURRICULAR ACTIVITIES

- Member of Center of Excellence in Autonomous Mobility, MITB
 - Vice-chair of IEEE VTS, MITB
 - Treasurer of NSS Unit, MITB
 - Core Committee - Cultural fest, Falak'25, MITB
 - Organizing Committee (Logistics) - Technical fest, Solstice'25, MITB
-
